Western Philosophy and Ideology	17	Video Cassettes	39
Who Rules America?	18	Audio Cassettes	40
National Socialist Revolution	24	Index	44
Race: Science and Sociology	25		

Why National Vanguard Books?

No group of people can hope to gain control of their destiny unless they possess two essential things: the will to survive *as a people* and knowledge. The purpose of NATIONAL VANGUARD magazine is to provide knowledge on a continuing basis (usually knowledge which is not readily available elsewhere) and a little inspiration as well, in the hope that the inspiration and the knowledge together will strengthen and guide the will of the reader to participate in shaping the future of his people.

More knowledge is needed than can be provided by NATIONAL VANGUARD alone, however, if the reader is to have a well-guided will. He needs, first of all, an unshakable sense of identity: an understanding of who he is and what his relationship is to the world around him. This can come only from a broad knowledge of the history of his people. He needs to know their most distant origins, their characteristics, their strengths and weaknesses, the ways in which they differ from other peoples. He needs a knowledge of the way they have been shaped by events over the centuries and of the present challenges facing them.

In addition, he should have an acquaintance with the folk traditions, the legends and myths, and the lives of the great heroes of his people. He should be familiar with their natural spiritual inclinations, the directions of their philosophical questing, and their cultural achievements over the ages.

Finally, he must have as intimate as possible a knowledge of the enemies of his people.

Books are a natural source for all of this knowledge. Unfortunately, however, the most valuable books are not readily available. Bookstores are afraid to stock them, and the controlled media will not review them or permit them to be advertised. Many have been purged from libraries by alien groups determined that we not be permitted to regain control of our destiny. Even the universities have practically ceased functioning as disseminators of the knowledge necessary for a proper sense of identity; with an emphasis on "equality" at any cost, the teaching of Western history and culture has become awkward, at best.

Even when books have not deliberately been suppressed, they may be hard to find. Then there are the problems of choice and evaluation. Is a given book on history or race or politics really worth reading? Can its author be trusted? Where there are several choices in a particular subject, which is the book to buy? If each has something valuable in it, which should be read first?

National Vanguard Books exists to overcome all of these problems: It finds, evaluates, and makes available the books containing the facts and ideas essential to the survival and progress of our people. The books in this catalog have been gathered from several countries. Some are published by major firms with New York or London addresses; others come from "underground" printers with very limited distribution channels. Each has been selected because it has something valuable to offer.

The descriptions of the books in the catalog are necessarily brief, but they have been written with the interests of the racially conscious reader in mind. They provide a reliable synopsis of the contents of each book and an evaluation of its salient features.

The prices are as low as National Vanguard Books, which is a non-profit operation, can make them. Many are substantially reduced from the publishers' original prices.

A Guide for Readers

Some books are essential to a basic understanding of the task facing us as a people. Others are also important, but primarily for filling in the details. The following guide is for those readers who want to be sure that they read all of the really essential books, and then as many of the others as their time and pocketbooks will permit, and who want to read them in a logical sequence.

• **HISTORY**—We should base our study of history on a knowledge of European prehistory. That is, before we begin compartmentalizing into Greek history, Roman history, German history, English history, and so on, we should understand the common racial, linguistic, and cultural roots of all of our Aryan ancestors. We should see the racial and tribal patterns in ancient Europe before we become distracted by national patterns.

The text and maps of McEvedy's *Atlas of Ancient History* give an excellent, concise overview of European and Middle Eastern prehistory. *Goddesses and Gods of Old Europe* and *The Beaker Folk* give a view of pre-Aryan

continental Europe, and *Prehistoric Avebury* and *The Blood of the British* look at the Megalithic Era of prehistory in the British Isles.

In Search of the Indo-Europeans provides an excellent introduction to the study of Aryan origins. Finally, the *Dictionary of Indo-European Roots* gives an introduction to the prehistoric language common to the Aryan peoples.

After that one can focus on specific areas and peoples. For the Celts there are *Celtic Britain*, *Arthur's Britain*, and Chadwick's *The Celts*.

For the Germanic peoples there are *The Vikings*, *The Long-Haired Kings*, *History of the Goths*, *The Norse Discoveries and Explorations of America*, and *Runes*.

Tacitus' fascinating *Agricola* and *Germania*, combined in one volume, and Caesar's *Conquest of Gaul* give views of the life of both the Celts and the Germans of two millennia ago.

Moving into the historical era, *Ancient Greece* and *The Penguin History of Greece* provide a good overview of Hellenic civilization. More details are found in Herodotus' *Histories*, the books on Alexander's conquests by Arrian and Curtius, the treatments of the Peloponnesian War by Thucydides and Xenophon, and Livy's excellent books on Roman history (four of which are listed in the catalog). These can be supplemented by Kitto's *The Greeks* and Barrow's *The Romans*, which give excellent character sketches of the two peoples. Plato's *The Republic* and *The Laws* give a taste of the Classical-Pagan view of the world—which in many ways was both more Aryan and more modern than the Medieval-Christian view which followed it.

Essential for the study of the Middle Ages is McEvedy's *Atlas of Medieval History*. The story of the supplanting of Roman power by German power is told especially well in Bury's *Invasion of Europe by the Barbarians*. A good general survey is provided by *Everyday Life in Medieval Times*. Dealing with events on the Continent are *The History of the Franks*, *Chronicles of the Crusades*, and Bury's *History of the Later Roman Empire*. For medieval England *The Beginnings of English Society* and *English Society in the Early Middle Ages* are recommended.

For the current historical era an indispensable reference work is McEvedy's *Atlas of Modern History*. The book on the Thirty Years' War by Langer covers the most important conflict at the beginning of the modern era.

• **LEGENDS AND FOLKWAYS**—Racial identity is based on more than history; the soul of a people is in its legends and myths. For the Greeks and Romans the outstanding legends are Homer's *Iliad* and *Odyssey* and Virgil's *Aeneid*.

For the Anglo-Saxons the great classic is *Beowulf*. For the Celts *The Mabinogion* and Rolleston's excellent *Celtic Myths and Legends* are especially recommended. For the Germans *The Nibelungenlied* contains the text of the central legend, and the three illustrated *Ring of the Nibelung* books provide an especially enjoyable synopsis of Richard Wagner's operatic interpretation of this great body of Germanic lore.

For the Scandinavians all of the sagas are valuable, as well as *The Poetic Edda* and *Heimskringla*.

• **WESTERN RELIGION AND IDEOLOGY**—European religious myths are narrated in many of the books listed in the preceding section. A more scholarly look at the pre-Christian religion of Europe is found in Davidson's two books, *Gods and Myths of Northern Europe* and *Myths and Symbols in Pagan Europe*.

The modern expression of the Aryan race-soul is given in philosophical-religious terms in Shaw's *Man and Su-*

perman, in Nietzsche's *Thus Spoke Zarathustra* and *Twilight of the Idols* and *the Antichrist*, in Rosenberg's *Myth of the Twentieth Century*, in Simpson's *Which Way Western Man?*, and in Brown's *The Might of the West*; and in political-social terms in Hitler's *Mein Kampf*. All seven of these books are really indispensable for the reader who wants to understand the vexing problems of this age from an Aryan standpoint.

• **RACE: SCIENCE AND SOCIOLOGY**—Seven books on race eminently suitable for beginners are *Paved with Good Intentions*, *The Dispossessed Majority*, *Race and Reason*, *Why Civilizations Self-Destruct*, *Destiny of Angels*, *The Ideal and Destiny*, and *Black Intelligence in White Society*. Readers with an interest in the biology as well as the sociology of race will find Darwin's *The Origin of Species*, Baker's *Race*, and Coon's *Racial Adaptations* especially useful.

Valuable works on eugenics and dysgenics are *Ancient Eugenics*, *Eugenics and Race*, *War and the Breed*, and *Shockley on Eugenics and Race*.

The three volumes of *An Atlas of Mankind* give a good photographic survey of racial types.

• **THE ENEMY**—Beginners will find much of value in the two little books *Behind Communism* and *Bolshevism from Moses to Lenin*. Also good for beginners are *Jews Must Live*, *You Gentiles*, *The International Jew*, *The World Conquerors*, *Last Days of the Romanovs*, and *The Talmud Unmasked*.

Communism is not the only racially destructive movement the Jews have been behind; feminism (for Gentiles) is another, and two especially good exposures of its fallacies and its pernicious influence on American society are *The Great Sex Divide* and *Weak Link*.

The destructive role of the Jews in psychology and psychiatry becomes apparent from a reading of *The Decline and Fall of the Freudian Empire*.

The Judeo-democratic destruction of America's colleges and universities is detailed in two excellent books on Political Correctness, *Illiberal Education* and *Prof Scam*.

Much information about the Jewish role in the destruction of the U.S. economy is given in *The Predators' Ball* and *The New Crowd*.

The role of Zionism in the Jewish drive to destroy America is brought out in *Assault on the Liberty*, *The Zionist Connection*, *Deliberate Deceptions*, and *By Way of Deception*.

The Jews' claim to immunity from criticism, based on their unique "victim" status—specifically, on the alleged extermination of 6,000,000 of them in gas chambers during WWII—is dealt with in *Flashpoint*, *Auschwitz*, *The Hoax of the 20th Century*, *Did Six Million Really Die?*, and *The Holocaust Story and the Lies of Ulysses*.

Finally, the two video cassettes, *The Eternal Jew* and *The Other Israel*, are excellent documentaries which forcefully summarize the entire Jewish question. No patriot should be without them.

• **THE SECOND WORLD WAR**—The greatest calamity which has befallen our race in modern times was the Second World War. This suicidal conflict led us directly to the racial and moral chaos which is consuming the West today. Every racially conscious White person must understand what that war was really about and what really happened in it.

First, there are nine books in the catalog which help the reader to understand why there was a war in the first place and who wanted it. They are *Perpetual War for Perpetual Peace*, *Betrayal at Pearl Harbor*, *The Final Secret of Pearl Harbor*, *Infamy*, *The Impact of Hitler*, *Unconditional*

Hatred, Churchill's War, The Forced War, and Hitler: Born at Versailles.

There is hardly a need to offer the reader any books about the conduct of the war itself from the American side, because they are so readily and plentifully available elsewhere. But he may find it interesting to see what the war looked like from the other side. For this purpose Rudel's Stuka Pilot and Degrelle's Campaign in Russia, both written by outstanding warriors who were in the thick of it, cannot be matched. Commando Extraordinary, about the exploits of an extraordinary SS man, also is very good. Then there is the incomparable Wenn Alle Brüder Schweigen, a new edition of the best book ever on the SS.

Finally, there is the question of who the "good guys" and the "bad guys" were: who were the people fighting for the White race, and who was fighting against its interests; who showed a certain degree of decency and humanity in the conduct of the war, and who were the savages? The very disturbing answers will be found in The Destruction of Dresden, Dachau: Hour of the Avenger, Doenitz at Nuremberg, Advance to Barbarism, Nemesis at Potsdam,

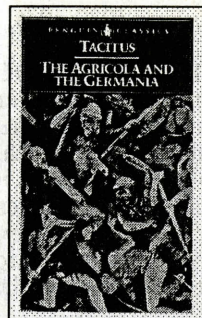

The Wehrmacht War Crimes Bureau: 1939-1945, and Other Losses.

• THE SOLUTION: WHAT IS TO BE DONE NOW—The reader who is concerned about the future as well as the past should now read again both Mein Kampf and Which Way Western Man? And he definitely should read The Best of Attack! and National Vanguard Tabloid, which is the best bargain in the catalog. Finally, unless he is a timid or squeamish soul, he should read Hunter and The Turner Diaries. The government and the controlled news media have been raising quite a fuss about the last of these books for the past few years.

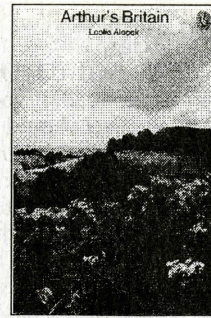

The reader who begins a library with the 100 or so books recommended here will have a very valuable source of knowledge and inspiration at hand indeed. He can then pick and choose from among the remaining books in the catalog to continue building his library, his knowledge, and his will to participate in shaping the future for his people.

W. H. Price

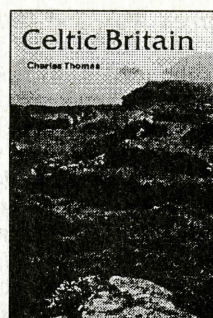

Director, National Vanguard Book

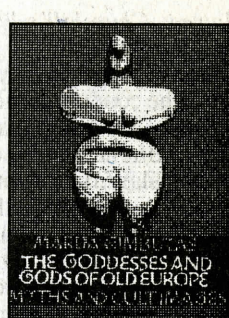

224. AGRICOLA and GERMANIA Tacitus—Two short books in one volume. The first focuses on Britain and the second on Germany. Both were written about 100 AD. They provide a firsthand account of the characteristics of the ancient Celts and Germans. The Germania, in particular, is highly recommended for those who want insight into the lives and values of the founders of the West. 175 pp soft \$5.95

233. ARTHUR'S BRITAIN Alcock—Celtic Britain during the period between the Roman collapse and the Anglo-Saxon conquest. The author presents a comprehensive examination of the historical evidence regarding the reign and times of the semi-legendary King Arthur. The book covers the years 367-634 AD. Bibliography and index. Illustrated with 55 photographs and 33 drawings. 415 pp soft cover \$11.00

262. CELTIC BRITAIN Thomas—Beautifully illustrated, covers Celts in Britain from end of Roman times to arrival of the Norsemen (ca. 400 to ca. 800). This is King Arthur's Britain, described by an archaeologist and historian: art, lifestyles, warfare, language, religious change, conflict with the invading Saxons, ruins at Tintagel and elsewhere. Published at \$22.50. 200 pp hard cover SPECIAL! \$17.95

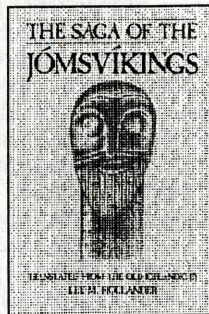

New book!

492. GODDESSES AND GODS OF OLD EUROPE Gimbutas—The Neolithic peoples of Europe from the mid-7th to the mid-4th millennium BC, before the arrival of the Aryans, had cultures which were very closely bound up with the concept of fertility, judging from the "fertility goddess" images they left behind. Author is a leading authority on Old Europe, and her evidence forms a fascinating picture. Copiously illustrated. 304 pp soft cover \$16.95

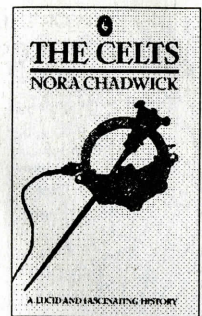

European Prehistory, Archaeology, and Folkways

A knowledge of and appreciation for the history of our Aryan ancestors are absolutely necessary for even the short-term survival of our people. We need to have a good acquaintance with our roots before we can know who we are and make sound plans for our future. We have assembled here a substantial collection of works dealing with the prehistoric cultures of the Aryan peoples, whose world stretched from northwestern Europe all the way to the Indian subcontinent, which the Aryans conquered and settled in the second millennium B.C. There are books on the megalith builders of prehistoric Brittany and England; on the Copper Age Beaker Folk and on the ancient Thracians of southeastern Europe; on the storied civilizations of the ancient Mediterranean; on the artistic achievements and high spirituality of the Celts; and on the world of the Germanic peoples, from the time of the "migration of peoples" down to the astonishing career of those legendary warriors of the North, the Vikings, whose adventures took them as far as North America.

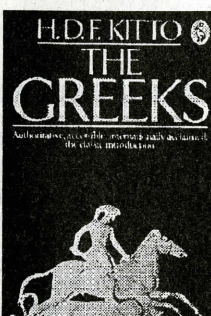

New book!

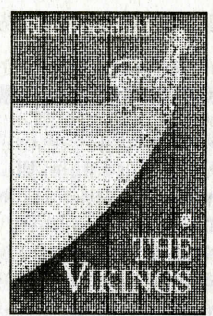

489. SAGA OF THE JOMSVIKING Hollander (translator)—Late in the 10th century a group of Vikings established a fortified community on an island at the mouth of the Oder River. It was called Jomsborg, and for more than a century it was the home of the most renowned warriors of the medieval world, the Jomsvikings. Utterly fearless in battle, valuing their honor above all else, their exploits became legend. This is the story. 116 pp soft cover \$6.95

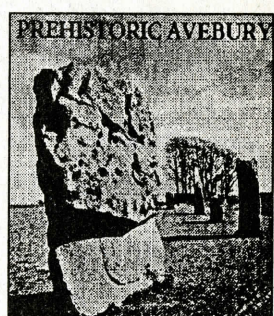

264. CELTS Chadwick—An excellent study of the Celtic peoples, beginning with their origin and expansion throughout continental Europe and continuing with their arrival in Britain in the 5th century BC. Includes in-depth examination of Celtic institutions and folkways, religion and mythology, art and literature, as well as the conversion of the Celts to Christianity. Illustrated with maps & plates. 301 pp soft \$11.00

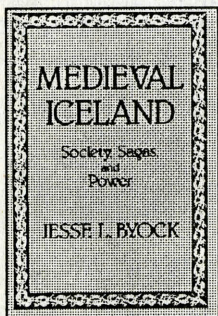

309. GREEKS Kitto—One of the best short introductions to the ancient Greeks. This is not a history, but rather an exposition of the mind, soul, and character of the Hellenes. It includes an examination of the racial origin of the Greeks, with distinctions between Pelasgians, Achaeans, Ionians, and Dorians; their social organization; their culture; and their spiritual attitudes. Map, index. 256 pp soft cover \$7.95

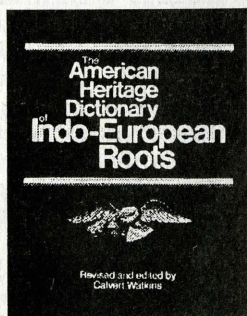

449. THE VIKINGS Roesdahl—Absorbing illustrated volume guides the reader through the legendary medieval world of the great Nordic seafarers and conquerors. The richly complex lives of the Scandinavians are revealed in chapters dealing with religion, art, warfare, and much more. The author's discussion of the Viking expansion across northern Europe and into Russia is especially stirring. 323 pp soft \$12.00

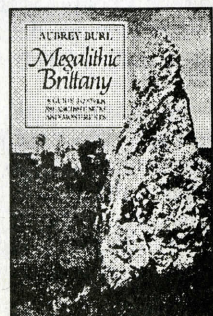

365. PREHISTORIC AVEBURY Burl—The huge stone circle at Avebury ranks with Stonehenge as one of the most important monuments of prehistoric Britain. This excellent archaeological and historical treatment brings the megalithic Britain of 5,000 years ago to life again, with a wealth of information about the people of that era, the megalith builders. Many color and b/w photos. 272 pp soft cover \$20.00

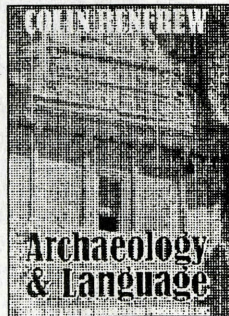

200. MEDIEVAL ICELAND Byock—Stunning piece of social history reveals that the Icelandic sagas, far from being merely fantasy-pieces for jaded literary appetites, are indeed magnificent quarries from which the anthropologist can gather materials for the portrayal of our northern ancestors. Although Old Norse authority Byock's sympathies are somewhat humanistic, Iceland's dark greatness pulsates from every page. Fascinating! 264 pp soft \$13.00

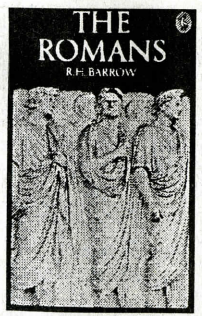

423. DICTIONARY OF INDO-EUROPEAN ROOTS Watkins—Compact intro. to Proto-Indo-European language of the ancient pre-Aryans and dictionary of 13,000 Indo-European word roots, showing connections among ancient and modern Aryan tongues. Example: peku (wealth), seen in Germanic as fehu and in Latin as pecunia. Invaluable to the student of race history. Sound-shift and language kinship charts. 140pp soft \$7.95

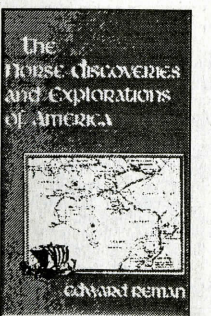

158. MEGALITHIC BRITANNY Burl—About 7,000 years ago, as the Neolithic Age began in northwestern Europe, the inhabitants of northwestern France began quarrying enormous stone blocks—megaliths—and using them to build structures whose remnants today provide clues about their lives then. This book is an illustrated guide to the megaliths of Brittany. Published at \$18.95. 176 pp hard cover SPECIAL! \$8.95

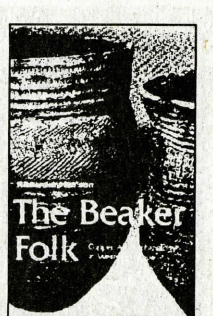

444. ARCHAEOLOGY AND LANGUAGE Renfrew—The scholar whose examination of the character, genius, and outlook of the ancient Romans has revolutionized our understanding and chronology of civilization in northern Europe, returns to prove, in high readable prose, that the Indo-European-speaking peoples appear earlier than we'd been led to believe. Maps, illustrations, and language charts furnish us with powerful aids to thought. 346 pp soft cover \$18.95

581. ROMANS Barrow—Searching for the character, genius, and outlook of the ancient Romans. Selected writings by a number of Roman authors—Virgil, Livy, Horace, Cicero, Tacitus, and others—which give the flavor of their times. There are chapters on Roman philosophy and religion and on the relations between Christianity, the Jews, and the Romans. 223 pp soft \$5.95

191. NORSE DISCOVERIES & EXPLORATIONS OF AMERICA Reman—Comprehensive study of voyages to North America by 10th-century Norsemen, their explorations and settlements on the new continent. Accounts from Icelandic sagas of Bjarni Herjulfsson, Gunnbjorn Ulfsson, Eirik the Red, Thorfinn Karlsefni, et al. Exciting story of Vikings battling elements & hostile savages. 201 pp hard \$9.95

245. BEAKER FOLK Harrison—Study of the people and culture of Central and Western Europe 4,000 years ago. The Beaker Folk, successors and perhaps descendants of Corded Ware (Battle-Axe) People, spread their metalworking skills across Europe, bringing the Copper Age to Western Europe. They are identified with their characteristically bell-shaped beakers, but this book tells much else of their culture. Well illustrated. 176 pp hard \$19.95

402. VIKINGS AND AMERICA Wahlgren—A fascinating study of archaeological, traditional and other evidence of Viking settlements in Greenland, Newfoundland, and Labrador by an outstanding scholar. Life in Greenland and northernmost America was harsh & difficult for Norse settlers; the fierce climate and conflict with skraelings took a heavy toll. This book presents what is known about that life. Beautiful illus. 192 pp hard \$22.50
